Compiled, mixed & recorded by Genom  
Mastered by [genomaudio.com](http://genomaudio.com)  
Photos & artwork by [michalmalolepszy.com](http://michalmalolepszy.com)

Duration 58 minutes 34 seconds  
Released in 2015

This set was recorded exclusively for atmoteka™. We chose the tunes that represent the whole spectrum of atmospheric tunes. In most ways chosen tracks represent darker and harder regions of drum and bass. We think that interpretation of the words "atmospheric drum and bass" can be more wider than subtle, gentle, ambient, jazzy and melodic tunes. We hope that this mix can prove that atmospheric can be also hard, dark and dirty. As usual this mix was recorded live with a two Pioneer CDJ 200, one Pioneer CDJ 100 and Vestax VMC004 mixer. You can find here also four tunes from our forthcoming album. Enjoy!

atmoteka™ is a project that has come to existence through and because of deep and authentic adoration of atmospheric & deep dnb. A radio show in the past, now a series of monthly podcasts/mixes brought to you on every first Sunday of each month. Each subsequent mix will be recorded especially for atmoteka™ by a special guest closely involved with atmospheric dnb – be it today or in the past. atmoteka™ is also a place where you can read about the latest news or listen to good music.
